Screen Navigation

Login Screen

The login screen serves as the entry point for the application. It prompts the user to enter their credentials (e.g., username and password) to log in.

Login Action

When the user taps the "Login" button or performs a similar action, the application should validate the entered credentials.

Successful Login

If the login is successful, the application will navigate the user to the home screen.
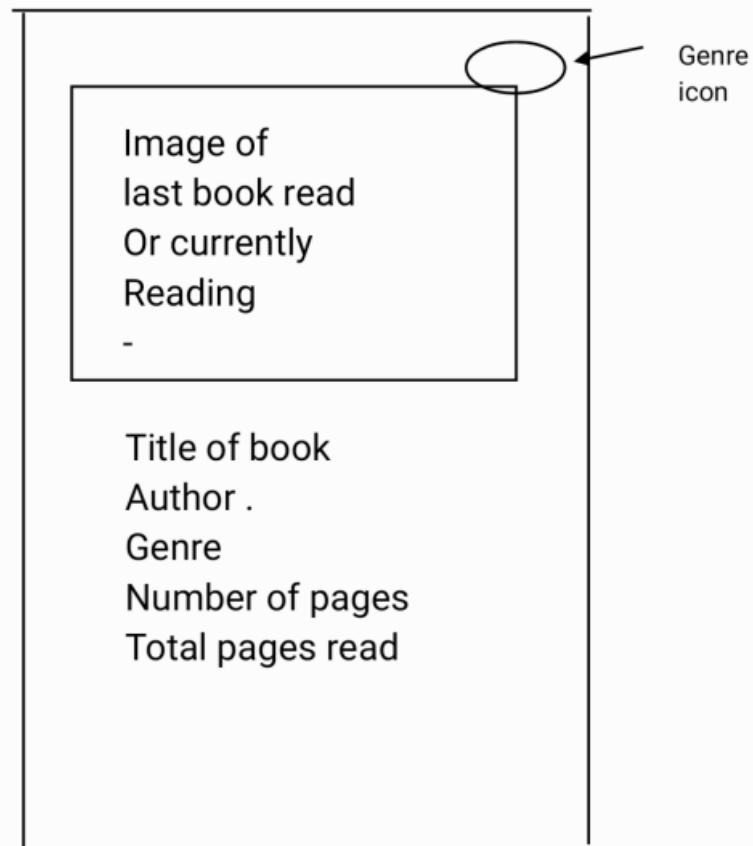

Home Screen

The home screen is displayed after a successful login. In the home screen the user should see the last book read or currently reading, they will be able to tap on the image of the book to continue reading or tap on the genre.

Genre Screen

This page will have images of the book and description next to it, the user can select a book or click on the search icon to search for a specific book.
